OUR STORY

We are passionate anglers that need equipment that is durable and appropriate for our adventurers. We backpack, canoe in the boundary waters, pack into the mountain on horseback. After not finding any equipment that responded to our needs, we decided to build it for ourselves and others that like to adventure.

We designed and built our Summit equipment to be affordable with the finest components that will not fail you. There is nothing worse than arriving at your fishing destination with a broken rod or non-functioning reel. All our products are not only built strong and sensitive but also come with protective cases to ensure all your equipment arrives ready to fish!
